

PANIMALAR INSTITUTE OF TECHNOLOGY

DEPARTMENT OF INFORMATION TECHNOLOGY

ALUMNI SURVEY

ACADEMIC YEAR:

Responses to this survey will be used to assess how well the Information Technology prepares its students to meet its educational objectives and outcomes. By answering the following questions, you will help in providing valuable feedback that is needed for program improvement.

PART – I: Alumni Personal Details:

Name of the Alumni : _____

Gender : Female Male

Year of Passing : -----

Degree/Branch : _____

Contact Address : _____

Mobile No : _____

Phone No (Res) : _____

Personal Email-ID : _____

Have you appeared for any competitive examination? Yes No

If Yes, Pl. Tick below.

Exams GRE TOFEL UPSC CAT
GATE IAS/IPS GMAT Others

Present Status Employed Higher Studies
Entrepreneur Not Employed

Designation : _____

Name of the Company : _____

Company Address : _____

Phone No (Off) : _____

Official Email-ID : _____

Please briefly describe about the responsibilities of your job

What is your progress in the employment in-terms of promotion?

- Initial Employment I Promotion II Promotion
 Team Lead Project Manager Others

If Higher Studies, Qualification acquired after leaving this college/pursuing

Course	Name of the College/Institution	Year of Passing
_____	_____	_____
_____	_____	_____

If self employed

Name of the Company : _____

Nature of the Activity : _____

Address : _____

Phone No (Company) : _____

Email-ID / Website : _____

PART –II

Please rate your satisfaction with the academic preparation you received in Information Technology as a student of Panimalar Institute of Technology

Please indicate the level in which you agree to the following statements.

1 = Very Unsatisfied 2 = Unsatisfied 3 = Neutral 4 = Satisfied 5 = Very Satisfied

S.NO	Program Outcomes	Very Satisfied	Satisfied	Neutral	Unsatisfied	Very Unsatisfied
PO1	Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.					
PO2	Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.					
PO3	Design / Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.					
PO4	Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.					

PO5	Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.					
PO6	The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.					
PO7	Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.					
PO8	Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.					
PO9	Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.					
PO10	Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.					
PO11	Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.					

PO12	Life-Long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.					
-------------	--	--	--	--	--	--

PART -III

The following are the Program Specific Outcomes for the Department of Information Technology. We expect graduates to achieve these objectives several years after graduation

Please indicate the level in which you agree to the following statements

1 = Strongly Disagree 2 = Disagree 3 = Neutral 4 = Agree 5 = Strongly Agree

S.NO	Due to my experience in the Information Technology program, I have been able to	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
PSO1	Basics of Computer System: Understand the principles and working of computer environment. I can assess hardware and software systems.					
PSO2	Implementation of algorithms: Apply suitable methodologies and algorithms to solve computational task and real time applications using appropriate data structures.					
PSO3	Foundation of Software development and Research: Possess professional skills and knowledge of software design process. Familiarity and practical competence in programming language and open source platforms are useful in creating new career paths and innovative ideas of research field.					

PART -IV

The following are the Program Educational Objective for the Department of Information Technology. We expect graduates to achieve these objectives several years after graduation.

Please indicate the degree of agreement of the following statements.

5 = Strongly Agree 4 = Agree 3 = Neutral 2 = Disagree 1 = Strongly Disagree

S.No.	Due to my experience in the Information Technology program, I have been able to	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
1	To bestow the students with skills of mathematics, science and basic engineering to formulate, analyze and solve engineering problems.					
2	To prepare students to apply their acquired skills in emerging technology and make them to be employed in area of Information technology.					
3	To pursue higher education or to apply the technical knowledge as practicing professionals.					
4	To conduct themselves in a responsible, professional and ethical manner					
5	To improve knowledge, skills and competences within a personal, social and employment-related perspective, by learning new technologies.					

Can you specify any training you undergone in IT department, which has been useful for your career?

Can you specify any course(s) that may be added to make graduates more competent and employable?

Remarks, if any :

Date:

Signature of the Alumni
