About IEEEExtreme:

IEEEExtreme is an annual hackathon and competitive programming challenge in which teams of IEEE Student members, often supported by an IEEE Student Branch and proctored by an IEEE member of higher membership grade, compete in a 24-hour time span against each other to solve a set of programming problems. The competition is underwritten and coordinated by IEEE's Membership and Geographic Activities department, and is often supported by partnering sponsors, like IEEE Computer Society.

Scope of IEEE Xtreme 12.0:

Winning IEEEExtreme is clearly a good prelude to a career in IT and coding. A 2014 article in the "The Institute" member newspaper reveals how members of winning teams have founded startups and secured jobs with tech companies such as Amazon. There is obviously strong competition within and between the universities that participate in the countries where it is popular – not just the United States but also India, Sri Lanka and Tunisia to name just three.

Outcome:

- Provides an extended opportunity for the student members to get awareness about IEEEExtreme.
- Awareness about Rules, Eligibility Criteria & Prizes of IEEEExtreme 12.0.
- To disseminate information about volunteering for future IEEE XTREME program.
